

Pressure measuring tool Amiad

Amiad

The Amiad measuring needle makes it possible to measure the pressure at several points in an irrigation system using one pressure gauge. This offers an economic advantage, but also a higher accuracy because measuring differences between pressure gauges are ruled out.

APPLICATION

Pressure measurement points can be installed at any desired point in the irrigation system except in the intake lines

CHARACTERISTICS

- ✓ Allows simple pressure measurements
- ✓ Sturdy design made of brass and stainless steel

TECHNICAL DATA

Measuring needle connection	: ¼" BSP female
Measuring valve connection	: ¼" male (1/8" BSP male and barb 4 - 7 on request)
Measuring needle material	: brass (body) : stainless steel (needle)
Measuring valve material	: plastic (body) : rubber (valve)

Clogging indicator

Amiad

Netafim offers a special clogging indicator that enables the status of the filter screen to be monitored without interrupting the filtration process. A red button jumps up if the pressure difference across the filter reaches 0.5 bar and the filter needs to be cleaned.

CHARACTERISTICS

Simple mounting on any type of filter

TECHNICAL DATA

Compatibility	: manual filters from 2" - 14"
Pressure difference	: 0.5 bar

Filter is clean

Filter needs to be cleaned
