

PVC pressure pipe with KIWA certification

Pressure pipe with KIWA certification is used in drinking water systems where a maximum working pressure up to 16 bar is required. The pressure pipe is made from special KIWA raw material that gives off no odour or taste to the water.

APPLICATION

Transport of water in drinking water systems

CHARACTERISTICS

- ✓ Recognisable from the imprint 'Kiwa'
- ✓ Available in pressure classes 7.5 / 10 / 12.5 (lengths of 5 meter) and 16 bar (lengths of 4 meter)
- ✓ Pipes up to 12.5 bar have a moulded adhesive insert and a chamfered end
- ✓ For further information, see: PVC pressure pipes
