

PVC sprinkler pipe (white/black) - sprayplus

A special sprinkler pipe is the white sprinkler pipe for the installation of greenhouse sprinklers. These pipes have a thicker wall at the location of the threaded hole so that the sprinkler to be installed has more grip on the pipe wall.

CHARACTERISTICS

- ✓ Predrilled 3/8 WW or M11 threaded holes for irrigation sprinklers in 25/32/40 mm dia. at 75, 100 and 150 cm intervals. See drilling table for PVC sprinkler pipe (blue/grey)

TECHNICAL DATA

Diameter	: 25, 32 and 40 mm
Maximal pressure	: 10 bar (dia. 25/32 mm) : 7.5 bar (dia. 40 mm)
Length	: variable, length based on drilling distance
Connection	: with moulded adhesive insert

Intersection
