

Polyester tanks

Polyester tanks are light in weight combined with high mechanical strength. A distinction must be made between bins, ground wells and filter wells.

APPLICATION

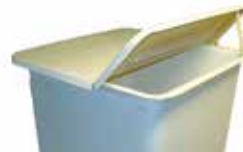

Plastic fertiliser bin, filter, drainage and water meter wells, decontamination bins, sprayer and septic tanks

CHARACTERISTICS

- ✓ Outstandingly resistant to corrosion and chemical influences
- ✓ Good heat and electrical insulating properties
- ✓ Different sizes, forms and colours possible
- ✓ Available as standard with: Legs, legs and tap, baseplate, cover, cover with piano hinge
- ✓ Also available: Water meter wells, filter wells, leakage bins (made-to-measure)

TECHNICAL DATA

Volume	: 100 to 3.300 litres (deviating sizes on request)
Shapes	: square, rectangular, round (standard)
Sizes	: see portfolio section
Material	: polyester
Colour	: grey (standard)
Option	: heavy plate (for use in the ground) : heavy cover : manhole (for service) in the cover : filter well with stainless steel screen (on galvanised frame)

INSTALLATION & MAINTENANCE

- ✓ Simple to install on a flat, solid substrate
- ✓ The polyester bins require very little maintenance
